# Privacy Policy for Pault

Last updated: February 6, 2026

## Overview

Pault is a macOS app for saving, organizing, and reusing prompts. This policy explains what data Pault handles and how that data is used.

## Data We Collect

Pault is designed to run locally on your Mac. We do not operate a hosted user account system for Pault and we do not require sign-in to use core features.

Data you create in the app may include:

- Prompt titles and prompt content.
- Tags, favorites, and archive state.
- Local app preferences.

## How Data Is Stored

Prompt library data is stored on-device using local app storage on macOS. Data remains under your control on your machine unless you choose to share or back it up through your own tools.

## Permissions and System Access

Pault may request macOS permissions for:

- Accessibility: used for optional paste automation into the active app.

Pault only uses these permissions to enable user-initiated features.

## Data Sharing

We do not sell personal information. We do not share your prompt library data with third parties for advertising.

## Data Retention

Because Pault stores data locally, retention is controlled by you. You can edit, archive, or delete your prompts at any time.

## Children's Privacy

Pault is not directed to children under 13, and we do not knowingly collect personal information from children.

## Changes to This Policy

We may update this policy from time to time. If material changes are made, we will update the "Last updated" date on this page.

## Contact

For privacy questions, contact:
